Extra Field

Angles, Central Luzon, Philippines

SUMMARY

Full-Stack Developer and AI Specialist with expertise in React, Next.js, Node.js, Python, and cloud platforms. Strong background in building REST APIs, microservices, and scalable architectures, along with hands-on experience in AI integration, LLM pipelines, and automation systems. Adept at delivering clean, maintainable code and optimizing performance across web and mobile platforms.

EDUCATION

- 04/2013 - 09/2017 • Bachelor of Computer Science
Technological University of the Philippines

EXPERIENCE

- 11/2024 - 02/2026 • Senior Full Stack Developer
Singapore, Remote
Apstellar Pte Ltd - Full Time
Singapore-based consulting firm focused on business expansion, digital solutions, and market entry services in Southeast Asia, Thailand.
 - I have built scalable full-stack applications using **React, Node.js, Python**, and integrated **AI solutions (OpenAI/LLMs)** for automation, chatbots, and data-driven systems, delivering efficient, production-ready solutions aligned with business needs.
 - Decreased software deployment time by 50% by implementing an optimized CI/CD pipeline with containerization.
 - Optimized database queries improving system speed by 25% by restructuring MySQL databases and implementing advanced indexing.
 - Enhanced user engagement by 35% through implementing intuitive AI-powered UI/UX features.
 - Reduced server costs by \$200,000 annually by optimizing backend microservices performance and infrastructure utilization.
 - Managed a portfolio of 15 large-scale web applications, each exceeding user base of 100,000.
- 08/2021 - 06/2024 • Full Stack Developer
Philippines
CADOGAN REALTY CORPORATION - Full Time
Philippines-based real estate company providing property sales, leasing, and real estate investment services.
 - Managed a project of 10,000+ lines of code for a real estate platform redesign.
 - Enhanced user engagement, increasing website visits by 35% through optimized responsive design.
 - Worked on a 15-member team to launch 12 successful full-stack applications annually.
 - Reduced server costs by 25% through efficient cloud resource allocation, resulting in annual savings.
 - Boosted system reliability by 40% by implementing robust error-handling strategies and infrastructure.
 - Achieved a 50% decrease in page load time by optimizing API endpoints and caching mechanisms.
- 05/2018 - 03/2021 • Frontend Engineer
Philippines
CGC Development Group INC - Full Time
Rentals - Commercial Establishments
 - I built scalable, high-performance web applications using React, Next.js, TypeScript, Tailwind CSS, and API integrations, delivering fast and responsive user experiences aligned with business needs.
 - Increased user engagement by 90% through integrating OpenAI chatbots for intelligent interactions.
 - Streamlined codebase resulting in a 25% reduction in page load time.
 - Improved user interface leading to a 15% increase in customer engagement.

LANGUAGES

Filipino
Native

English
Proficient

SKILLS

Frontend

HTML5, CSS3, JavaScript, TypeScript, Responsive Design, React.js, Next.js, Vue.js, Redux, Zustand, Context API, Tailwind CSS, Bootstrap 5, Material UI, ShadCN UI, REST API integration, GraphQL, WebSockets, Third-party integrations, AI-powered UI/UX, AI APIs

Backend

Node.js, Python, PHP, Laravel, FastAPI, Django, REST API design, JWT, OAuth2, RBAC

Databases

MySQL, PostgreSQL, MongoDB, Redis, Prisma, Sequelize, TypeORM

Cloud & DevOps

AWS / GCP / Azure, Docker, Kubernetes, CI / CD pipelines, Git / GitHub / GitLab, Postman / Swagger, Winston, Datadog, Prometheus, Vercel, RabbitMQ, Kafka

AI

LLM APIs, Prompt Engineering, RAG Pipelines, AI Chatbots, NLP, AI Automation, Data Handling, OpenAI API, LangChain, Vector Databases

TRAINING / COURSES

AI-Powered Application Development

AI-Powered Application Development – Coursera (2025)

Backend Engineering & Cloud Systems

Udacity

Cloud & DevOps Engineering

Udemy - DevOps Bootcamp (Docker + AWS + CI/CD)

ADDITIONAL EXPERIENCE

10/2017 - 04/2018

Global - Remote

Full Stack Developer

Freelancer.com

Global freelancing platform connecting businesses with professionals for remote projects across technology, design, and digital services.

- I completed multiple full-stack projects on Freelancer.com, building scalable applications using React, Node.js, and Python, integrating APIs and AI features, and consistently delivering high-quality solutions aligned with client requirements.

01/2018 - 05/2018

Global - Remote

Full Stack Engineer

Upwork

Upwork is a global freelance marketplace that connects businesses with independent professionals for remote work across fields such as software development, design, marketing, and writing.

- I built automation and web scraping systems using Python and integrated AI solutions (OpenAI/LLMs) to streamline workflows, extract data at scale, and deliver efficient, business-focused solutions for clients on Upwork.

CERTIFICATION

Website Development Certificate

Udemy, 2022

AI-Powered Application Development Certificate

Coursera, 2025

KEY ACHIEVEMENTS

Full-Stack + AI

- Built scalable full-stack applications using React, Node.js, and Python, delivering production-ready solutions for multiple clients
- Integrated OpenAI-powered chatbots, increasing user engagement by up to 90%
- Developed AI-driven automation systems, reducing manual processes and improving operational efficiency

Freelance / Upwork

- Delivered multiple full-stack projects on time, maintaining high client satisfaction
- Built automation and web scraping solutions using Python, handling large-scale data extraction
